Tornado RC Control Box Support Bracket

*A Design Change Has Been Made To The Tornado Support Bracket to Improve Stability
Applicable for all Tornado RC monitors manufactured before April 2017.*

The Tornado RC Monitor was designed to use two control box support brackets to ensure stability in both horizontal and vertical directions. This continues to work for most applications. In an effort to improve performance in extreme conditions, an additional bracket has been added. An upgrade kit is available (Y2132-KIT). Future shipments of Tornado RC's will include this upgrade.

FEATURES	BENEFITS
Additional Bracket	Reduces the stress placed on the other brackets thus improving the durability of monitor controller components

The following Y2132-KIT is available and can be installed quickly using a 3/16" & 5/16" hex key.

Included in Y2132-KIT (Colored for identification only):
