Search-Lite

Task Force Tips Search-Lite Kit features a compact & light-weight flashlight attachment to TFT handheld nozzles. Ideal for initial-attack or search & rescue operations. Hard-anodized aluminum light casing is tucked under the nozzle, safe from drop damage and is splash and weather proof. The battery holder is integrated right into the pistol grip. Comes with your choice of high-intensity Xenon light source or LED extended run-time light source. Max light output; Xenon source emits 4 times the light of a big two D-cell flashlight with 1.25 hours of continuous runtime and the LED source emits 2 times the light of a big two D-cell flashlight with 6 hours of continuous runtime. The Search-Lite Kit can fit any TFT handheld nozzles that have a Nylon pistol grip (except for the Bubble Cup & MAX series nozzles). When the Search-Lite kit is ordered together with a TFT handheld nozzle, the kit will be factory installed to the nozzle. Two 10-year shelf-life lithium batteries are included.

HGX-BLK-KIT

0.6 lbs (0.27 kg)
1.1" wide x 6" long x 5" high

HCL-BLK-KIT
