

TASK FORCE TIPS Technical Bulletin

ELECTRIC REMOTE WIRING CHANGE

As of March, 2005 Task Force Tips, Inc. made a change to the wiring of the electric remote actuators, which reverses the polarity of the electric motor. This change was made to accommodate the design of the RC monitors.

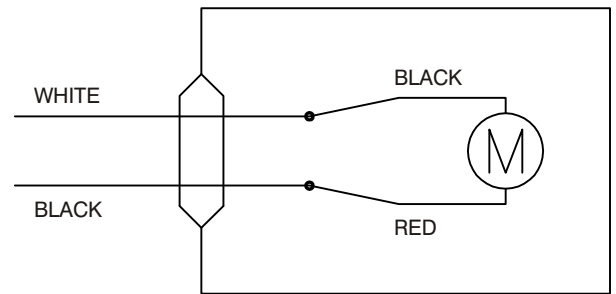

This change affects any electric remote nozzle that is ordered without a plug.

NOZZLE

**WIRE COLORS PRIOR
TO MARCH 2005**

NOZZLE

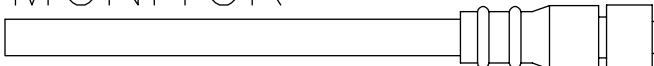

**WIRE COLORS AFTER
MARCH 2005**

Please make appropriate wiring schematic changes so nozzle actuation matches control signals.

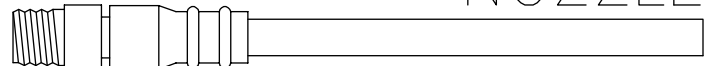

NOTE:

Nozzles for installation on Task Force Tips, Inc. electric RC monitors should be ordered with a plug. This makes the connection to the monitor electronics simple and waterproof.
