

Task Force Tips Ice Control Nozzles Pistol Grip Color Coding For Deicing And Anti-icing Nozzles

“The Society of Automotive Engineers (SAE) G-12E subcommittee, Aircraft Ground Deicing Equipment, has accepted the following color-coding for deicing and anti-icing fluids.

Deicing Fluids - Red with Yellow Stripe

Anti-icing Fluids - Green with Yellow Stripe”

In order to comply with this recommendation, Task Force Tips is offering the following solutions to color coding your existing ice control nozzles.

Older Style Grip:

If your nozzle has a pistol grip that looks like this

or has a serial number below TFTB-325000, heat shrink tubing of the appropriate color combination can be applied over the grip.
